

## Consent form

Perineal rehabilitation has been prescribed for you. The perineal muscles are hidden, internal: the endocavity work will be offered by manual and/or instrumental techniques.

Instrumental techniques require a probe that will be strictly personal and must be cleaned by you. Perineal rehabilitation respects certain contraindications.

I  report to my physiotherapist:

- ☐ latex allergy
- ☐ nickel allergy
- ☐ pregnancy or desire to become pregnant
- ☐ urinary or vaginal infection
- ☐ any other difficulty that could interfere my rehabilitation

Your consent can be withdrawn at any time.
