WHO ARE WE ?

OVER 45 YEARS OF EXPERIENCE IN MEDICAL ELECTRONICS

Mazet Santé is a brand of the **Électronique du Mazet** group, based in the Haut-Lignon plateau in Haute-Loire.

For over 45 years, the group has been **designing and manufacturing in France** electronic devices intended for professionals in the medical and aesthetic sectors.

INNOVATION AND EXPERTISE MADE IN FRANCE

For over 45 years, Mazet Santé products have been supporting physical therapists, midwives, hospitals, and clinics by offering them **high-performance solutions** in physiotherapy.

All our devices are designed and developed in close collaboration with our team of engineers and leading physical therapists to ensure **optimal ergonomics** and **validated clinical protocols**.

Our equipments are manufactured in our 1,400 m² workshop in Haute-Loire, where more than 50 employees work every day to guarantee **quality, reliability** and **innovation**.

HIGH-QUALITY, CERTIFIED, AND RELIABLE PRODUCTS

All our devices **comply with the most stringent regulatory requirements**. They have the **CE medical** marking issued by the **GMED (CE 0459)**, and our company is **certified** according to the **ISO 13485:2016** standard, a guarantee of **quality** and **process control**.

Each device is meticulously assembled in our workshops and then individually tested by our qualified technicians before shipment.

Our After-Sales Service is available to answer any questions or provide assistance. Our sales and technical teams are on hand to support and advise you on a daily basis.

All our devices come with a 2-year warranty, and their accessories with a 6-month warranty.

PELVIC FLOOR REHABILITATION

Monitor and computer not included

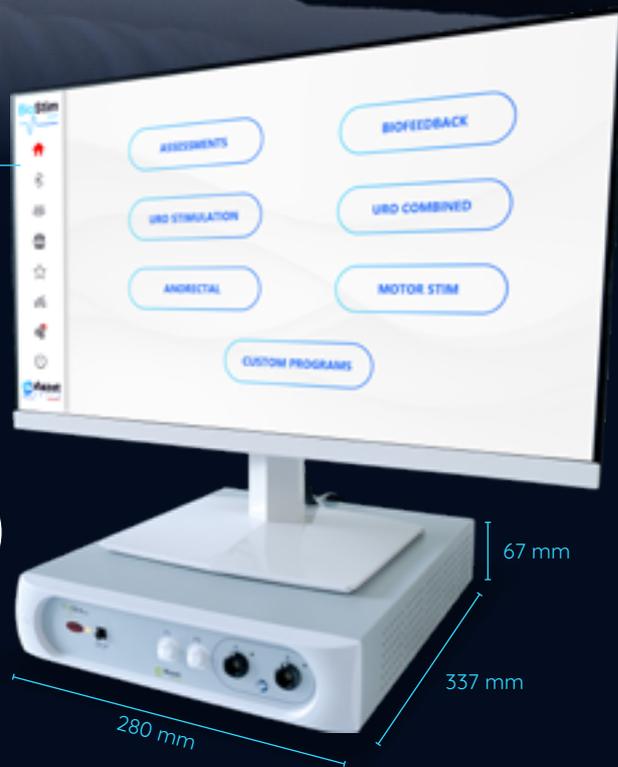

BioStim

PERINEAL RE-EDUCATION for all

BioStim is an electrotherapy and biofeedback device designed to assist physical therapists and midwives in perineal rehabilitation.

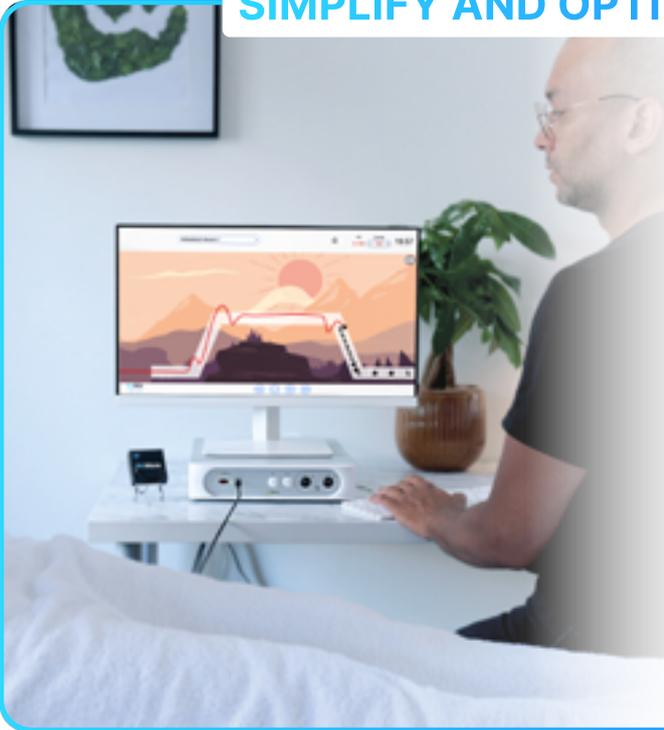

Thanks to its computerized technology, BioStim is **very easy to use** and **intuitive to navigate**. It includes **preconfigured programs** that enable most perineal rehabilitation treatments to be **carried out effectively**, both in the urogynecological and anorectal fields.

SIMPLIFY AND OPTIMIZE YOUR SESSIONS

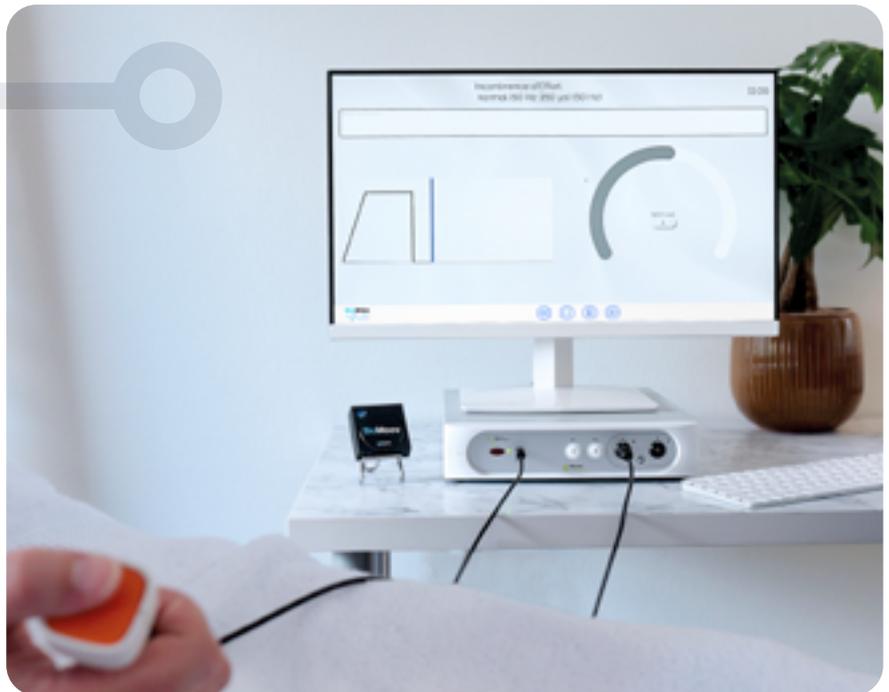

Much more than just a device, BioStim is a true rehabilitation center powered by a powerful and scalable software.

Windows and Mac compatible, it allows you to customize treatments, closely monitor each patient's progress, and fully leverage the potential of biofeedback to improve perineal and muscle awareness.

With more than 80 predefined programs that can be modified and adapted to all practices (urogynecological, anorectal, postpartum, etc.), BioStim is suitable for both young professionals, experienced practitioners and trainers

BIOSTIM INDICATIONS

- ✓ Postpartum rehabilitation
- ✓ Urinary and anal incontinence
- ✓ Prolapse (descent of organs)
- ✓ Anorectal pathologies
- ✓ Pelvic and perineal pain

TECHNIQUES OFFERED BY BIOSTIM

BIOFEEDBACK

Electromyography (EMG), pressure measurement, and relaxation exercises. Improved perineal awareness and muscle control.

PAIN RELIEF

Gate control and endorphin stimulation. Relief from perineal or pelvic pain.

EXCITOMOTOR

Neuromotor reprogramming, rehabilitation, and muscle strengthening.

MOVE, STRENGTHEN, PROGRESS: portable wireless biofeedback designed for perineal rehabilitation

Offer your patients an **active, interactive, and motivating** rehabilitation experience.

The BioPod is a **compact, wireless biofeedback** device connected via Bluetooth that transforms pelvic floor rehabilitation into a **dynamic and engaging** exercise.

Combined with the BioStim software, it enables **precise work** on relaxation, muscle strengthening, and perineal awareness through fun and personalized animations.

Ultra-lightweight and easy to install, the BioPod easily integrates into your office care protocols and enriches your patient follow-ups by offering mobile, movement-oriented rehabilitation.

BIPOD INDICATIONS

- ✔ Urinary incontinence (stress, mixed, urge)
- ✔ Anal incontinence
- ✔ Erectile dysfunction
- ✔ Postpartum rehabilitation
- ✔ Pelvic floor disorders (muscle relaxation / strengthening)
- ✔ Diffuse pelvic floor pain
- ✔ Pelvic floor pain

THE BENEFITS OF BIPOD

INTERACTIVE AND CUSTOMIZABLE BIOFEEDBACK

Real-time visualization, trend curves, progress tracking... for precise and motivating work

SUITABLE FOR HEALTHCARE PROFESSIONALS

Designed for physical therapists and midwives trained in perineal rehabilitation

SEAMLESS BLUETOOTH CONNECTION WITH BIOSTIM SOFTWARE

Quick setup, wireless operation, direct synchronization with your patient's file

INTUITIVE AND ERGONOMIC USE

Easy start-up, clear display, preset or customizable programs, adaptable animations

INTEGRATED PATIENT MONITORING

Every session is logged in the BioStim software, with the option to add comments, assessments, and comparative graphs

COMPACT AND LIGHTWEIGHT

Discreet case (120 × 80 × 25 mm, 110 g), easily transportable or usable on a belt

BioMoov

Proprioception in the service of PERINEAL REHABILITATION

BioMoov is an **innovative device** designed to integrate proprioceptive work into perineal rehabilitation sessions. It allows the pelvic floor to be exercised in situations of imbalance, with or without real-time visualization of muscle contractions.

This dynamic work promotes reflex engagement of the perineum in conditions similar to those encountered in everyday life.

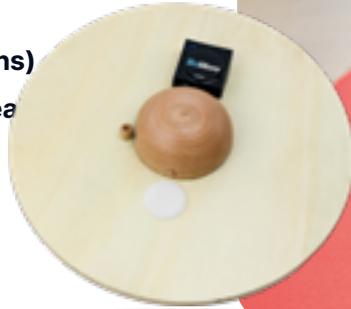

By analyzing the curves at the end of the exercise, the practitioner can verify the effectiveness of Anticipatory Postural Adjustment (APA), i.e., the ability of the pelvic floor to contract preventively before each movement.

BIOMOOV INDICATIONS

- ✓ Postpartum rehabilitation
- ✓ Urinary incontinence
- ✓ Prolapse (descent of organs)
- ✓ Pelvic and perineal pain

THE BENEFITS OF BIOMOOV

PRECISE CURVE ANALYSIS AT THE END OF THE EXERCISE

An objective review at the end of the exercise to assess the quality of motor responses and the effectiveness of APA

OPTIMAL BLUETOOTH CONNECTION TO BIOSTIM SOFTWARE

Quick and easy synchronization for direct integration into your sessions

MULTI-SUPPORT COMPATIBILITY

Compatible with various balance boards (Freeman board, Bosu ball, single- or dual-axis boards, etc.), BioMoov can be easily integrated into your healthcare environment

QUICK AND SECURE ATTACHMENT

Thanks to a Velcro system, the sensor can be easily attached to trays or directly to limbs (legs or arms) to analyze functional movements related to perineal contractions

PRE-RECORDED SPECIFIC PROGRAMS

Program designed for use with BioMoov in combination with a perineal probe

STRAP TO CAPTURE MOVEMENTS INCLUDED

FUN EXERCISES FOR THE PATIENT

PRESSOTHERAPY

PRESSOTHERAPY **at the heart of recovery and drainage**

At Mazet Santé, we design high-performance, scalable pressotherapy devices to support healthcare professionals in the treatment of circulatory, lymphatic, and muscular disorders.

Whether treating lymphedema, relieving circulatory disorders, improving muscle recovery, or simply promoting a sense of well-being, our range of pressotherapy devices is suitable for all patient profiles and practices.

From mobile and smart solutions, such as the Activ'Press, to connected and fully configurable devices such as the iPress series 6, series 10, or 10+, each device has been designed to combine therapeutic effectiveness, ease of use, and precision in care.

THE BENEFITS OF PRESSOTHERAPY

- ✔ Improves venous and lymphatic return
- ✔ Effective complement to manual drainage
- ✔ Adapted programs: resorption, fragmentation, stimulation, etc.
- ✔ Gentle, non-invasive, and comfortable treatment for the patient
- ✔ Uniform compression over the entire treated area
- ✔ Versatile : health, well-being, and aesthetics

Our pressotherapy devices are available in 4 versions to meet all your needs

	Activ' Press	iPress series 6	iPress series 10	iPress 10+
Predefined programs	12	21	28	28
User interface	Bluetooth Android or iOS	Bluetooth Android or iOS	Bluetooth Android or iOS	Built-in touch screen

Number of belt cells (belt optional)	4	5	5	5
Harnesses (10 cells)			Optional	Optional
Cell recovery			●	●
Pedestal table		Optional	Optional	Optional

Activ'Press

Connected pressotherapy at home

Activ'Press is a 4-cell pressotherapy device designed to make the benefits of this technology **accessible to everyone, right in their own home.**

Simple, intuitive, and controlled via a dedicated mobile app (iOS and Android), the Activ'Press allows you to **customize each session**: adjust the duration, pressure, or cell targeting, and track your treatment in real time from your smartphone or tablet.

ACTIV'PRESS INDICATIONS

- ✓ Heavy legs syndrome
- ✓ Post-exercise muscle recovery
- ✓ Relaxation and well-being
- ✓ Complement to slimming treatments

THE BENEFITS OF ACTIV'PRESS

REAL-TIME MONITORING

View and adjust the session at any time thanks to the real-time treatment display

TARGETED AND ADJUSTABLE TREATMENT

Adjust the pressure, duration, or deactivate certain cells for a customized treatment

INSTANT LAUNCH

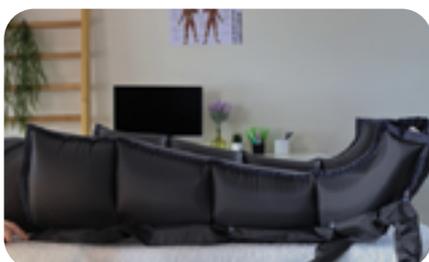

Start your session with just one click

ADAPTABLE ACCESSORIES

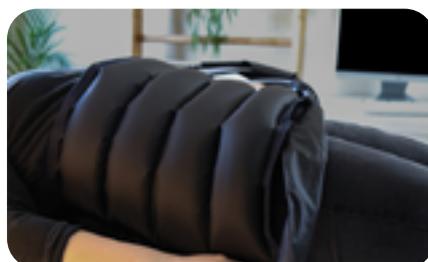

Boots, belt, or sleeve with 4 cells: designed to adapt to all body types comfortably and effectively

INTUITIVE MOBILE APP

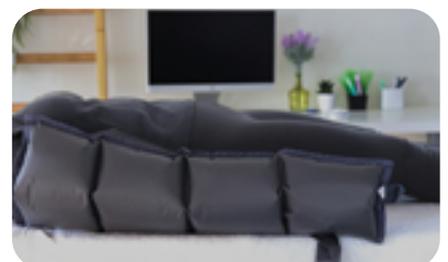

Set up your sessions from your smartphone or tablet for a completely personalized treatment

IPRESS INDICATIONS

- ✓ Lymphedema
- ✓ Toxin elimination
- ✓ Muscle recovery
- ✓ Relaxation
- ✓ Stimulating massage
- ✓ Intestinal sluggishness

THE BENEFITS OF IPRESS

INTUITIVE CONTROL

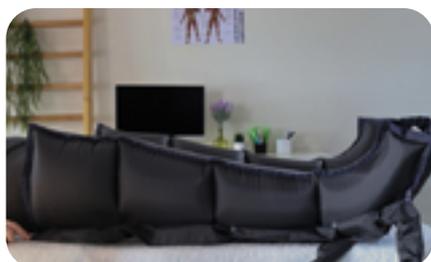

- **Series 6 and 10** : control via a dedicated mobile app (Android and IOS), thanks to a Bluetooth connection
- **10+** : built-in screen for direct simple and autonomous control

OPTIMIZED PRESET PROGRAMS

Developed in collaboration with expert practitioners, they cover a wide range of clinical needs for immediately effective care

COMFORTABLE AND ADAPTABLE ACCESSORIES

Boots, sleeves (optional) or belt (optional): all accessories are made from lightweight, durable, and comfortable materials, and easily adapt to all body types for consistent and continuous care

BOOTS

AUTOMATIC DEFLATION

Active deflation at the end of treatment ensures a smooth and comfortable transition, while optimizing the effectiveness of drainage

PERSONALIZATION OF CARE

Selection and isolation of cells for localized treatment, real-time display of parameters, recording and adjustment of sessions according to each patient

DETAILED PROTOCOL AND USER SUPPORT

Access to a comprehensive guide to integrated programs and clear documentation for quick start-up and safe use

CONTROL VIA APP
ANDROID AND IOS (SERIES 6 AND 10)

CONTROL VIA INTEGRATED SCREEN
(10+)

VACUUM THERAPY

b-Lift+

VACUUM THERAPY for wound care

The **b-Lift+** is an innovative vacuum therapy device designed to gently mobilize tissue using controlled suction that closely replicates manual massage techniques.

By adjusting the pressure and size of the suction head, the **b-Lift+** promotes hyperemia, tissue softening and detachment, while stimulating cellular exchange.

Its intuitive touch screen provides access to a wide range of **customizable programs** to suit each patient and each indication.

Scan this QR code to learn more

B-LIFT+ INDICATIONS

- ✔ Scars
- ✔ Edema
- ✔ Burns
- ✔ Tendinopathies
- ✔ Neck pain, back pain,
lower back pain, sciatica

THERAPEUTIC BENEFITS

- ✔ Drainage
- ✔ Hyperemia : improved oxygenation
and waste elimination
- ✔ Defibrosing effect
- ✔ Analgesic effect
through sequentiality

THE BENEFITS OF B-LIFT+

INTUITIVE TOUCHSCREEN INTERFACE

The sleek touchscreen design, combined with smooth navigation, makes it easy and enjoyable to use every day

VARIOUS TREATMENT MODES

Continuous or pulsed mode operation, with separate high and low vacuum settings for precise and comfortable treatment

PRE-SET PROGRAMS FOR EACH INDICATION

Optimized protocols are directly accessible for the treatment of scars, edema, musculoskeletal pain, burns, and other tissue pathologies

INSTANT LAUNCH

Just one click is all it takes to start your session

PRACTICAL OPTIONAL FURNITURE

A dedicated pedestal table, equipped with trays and storage space, is available to help you organize your treatment area efficiently

MODERN AND COMPACT DESIGN

Its sleek design and practical size make it easy to integrate into any healthcare environment

CUSTOMIZABLE SETTINGS

Each treatment can be adjusted according to the patient's needs: session time, vacuum intensity, pulse rate, etc. You can also create and save your own program

7-PIECE SUCTION HEAD KIT

Heads of various sizes for targeted, precise care tailored to each area of the body

ERGONOMIC STYLUS

Quick head change, with manual or automatic intermittent mode controllable at the touch of a finger

MINI KNEADING ROLLER 10 MM (included) / KNEADING ROLLERS 34 MM AND 46 MM (optional)

Ideal option for beauty treatments. Stimulates circulation and helps to reshape the skin
